

MITRE ATT&CK; Software Analysis (S0600–S0610)

S0600 — Doki

Field	Information
Type	Backdoor / Malware
Description	Linux malware targeting Docker/cloud environments using a Dogecoin-based DGA.
Threat Actor	Cryptojacking and cloud-focused attackers
Platforms	Linux, Docker
ATT&CK Techniques	T1059, T1071, T1496
Execution Method	Compromised Docker APIs
Persistence	Auto-restarting containers
Indicators of Compromise	High CPU usage, suspicious containers
Detection & Mitigation	Secure Docker APIs and monitor containers
Reference	https://attack.mitre.org/software/S0600/

S0601 — DropBook

Field	Information
Type	Malware
Description	Espionage malware used for persistence and data theft.
Threat Actor	Cyber espionage groups
Platforms	Windows
ATT&CK Techniques	T1055, T1027
Execution Method	Phishing attachments
Persistence	Registry keys and tasks
Indicators of Compromise	Suspicious registry changes
Detection & Mitigation	Use EDR and email filtering
Reference	https://attack.mitre.org/software/S0601/

S0602 — Circles

Field	Information
Type	Spyware / Surveillance Platform
Description	SS7 surveillance platform intercepting calls and SMS.
Threat Actor	Commercial surveillance operators
Platforms	Telecom infrastructure

ATT&CK Techniques	T1412, T1430
Execution Method	SS7 exploitation
Persistence	Telecom-level access
Indicators of Compromise	Abnormal SS7 activity
Detection & Mitigation	Deploy SS7 firewalls
Reference	https://attack.mitre.org/software/S0602/

S0603 — Rootkit GTM

Field	Information
Type	Rootkit
Description	Rootkit used for stealth persistence.
Threat Actor	APT groups
Platforms	Windows
ATT&CK Techniques	T1014, T1562
Execution Method	Installed after compromise
Persistence	Kernel-level persistence
Indicators of Compromise	Hidden drivers and processes
Detection & Mitigation	Kernel integrity monitoring
Reference	https://attack.mitre.org/software/S0603/

S0604 — ElectroRAT

Field	Information
Type	Remote Access Trojan
Description	Crypto-targeting RAT stealing wallet credentials.
Threat Actor	Cybercriminals
Platforms	Windows, Linux, macOS
ATT&CK Techniques	T1555, T1082
Execution Method	Fake crypto apps
Persistence	Startup tasks
Indicators of Compromise	Unknown Electron apps
Detection & Mitigation	Install trusted applications only
Reference	https://attack.mitre.org/software/S0604/

S0605 — GoldenSpy

Field	Information
Type	Backdoor
Description	Backdoor hidden in Chinese tax software.
Threat Actor	Suspected state-linked actors
Platforms	Windows
ATT&CK Techniques	T1547, T1071
Execution Method	Bundled software installation
Persistence	Windows services
Indicators of Compromise	Unexpected services/tasks
Detection & Mitigation	Verify software integrity
Reference	https://attack.mitre.org/software/S0605/

S0606 — PowerPunch

Field	Information
Type	Malware Loader
Description	PowerShell malware loader delivering payloads.
Threat Actor	Targeted malware campaigns
Platforms	Windows
ATT&CK Techniques	T1059.001, T1105
Execution Method	Malicious scripts
Persistence	Scheduled tasks
Indicators of Compromise	Encoded PowerShell commands
Detection & Mitigation	Enable PowerShell logging
Reference	https://attack.mitre.org/software/S0606/

S0607 — FatDuke

Field	Information
Type	Malware
Description	APT29-linked espionage malware.
Threat Actor	APT29 / Cozy Bear
Platforms	Windows
ATT&CK Techniques	T1055, T1071
Execution Method	Phishing campaigns
Persistence	Registry run keys
Indicators of Compromise	Encrypted suspicious traffic
Detection & Mitigation	Use MFA and EDR

Reference	https://attack.mitre.org/software/S0607/
-----------	---

S0608 — Zebracon

Field	Information
Type	Malware
Description	Lightweight malware used in espionage attacks.
Threat Actor	APT campaigns
Platforms	Windows
ATT&CK Techniques	T1071, T1105
Execution Method	Spear-phishing
Persistence	Registry persistence
Indicators of Compromise	Suspicious outbound HTTP traffic
Detection & Mitigation	Strengthen email security
Reference	https://attack.mitre.org/software/S0608/

S0609 — DEADEYE

Field	Information
Type	Malware
Description	Espionage malware used in advanced attacks.
Threat Actor	Advanced threat actors
Platforms	Windows
ATT&CK Techniques	T1055, T1027
Execution Method	Malicious attachments
Persistence	Startup entries
Indicators of Compromise	Unexpected registry changes
Detection & Mitigation	Patch systems and monitor activity
Reference	https://attack.mitre.org/software/S0609/

S0610 — SideTwist

Field	Information
Type	Backdoor
Description	OilRig-linked espionage backdoor.
Threat Actor	OilRig / APT34
Platforms	Windows

ATT&CK Techniques	T1071, T1105
Execution Method	Spear-phishing attachments
Persistence	Scheduled tasks and registry keys
Indicators of Compromise	Suspicious HTTP communication
Detection & Mitigation	Network monitoring and MFA
Reference	https://attack.mitre.org/software/S0610/
